

**NOW HIRING**

## **PROJECT MANAGER**

### **#FARMERPOWER**

Farmobile LLC is a growing AgTech startup passionate about helping farmers to collect, share and monetize their data for real-time visibility, better insights and revenue opportunities to strengthen farm families. Farmobile brings that mission to life with a culture founded on employee empowerment, mutual respect, collaboration and fun. Led by CEO Jason Tatge, Farmobile's team is 100% committed to organizing the industry by delivering never-before-seen technology to farmers while maintaining trust and transparency with customers. The team is full of rock stars, who work "hard and smart" to solve some of agriculture's biggest challenges. It is an amazing place to work. Join us!

### **DESCRIPTION**

The Project Manager is responsible for organizing projects and initiatives for external Farmobile stakeholders--customers and vendors--and internal Farmobile stakeholders. Customer facing projects include Farmobile Services+<sup>SM</sup> offerings such as data management, reporting, install and training, and strategic planning projects. Internal projects include product development, as well as business and technology initiatives.

The Project Manager works closely with customers, vendors, and a team of highly skilled and experienced engineers, product owners, analysts, and customer service professionals to deliver quality deliverables that make our customers happy. They are committed to being servant leaders for the team to increase collaboration, innovation, and trust while removing roadblocks.

### **RESPONSIBILITIES**

- Build and maintain project plans to support the strategic direction of the organization
- Provide periodic updates to project stakeholders tracking progress against goals and guiding key decisions within the overall project plan
- Coordinate and manage tasks and activities associated with achieving project goals and objectives
- Collaborate with other members of the commercial and delivery teams to improve overall processes and tools; specifically participate in improved organization and facilitation of customer facing projects and internal initiatives
- Serve as Scrum Master, organizing and facilitating product development initiatives:
  - Guide and organize the team on how to use Agile/Scrum practices and values
  - Work with Product Owners to groom and maintain the product backlog
  - Partner with development teams to ensure technical feasibility, allocate resources, and deliver prioritized and defined features
- Monitor progress and performance through appropriate project management tools, reporting issues and solving problems as they arise
- Establish and maintain relationships with external vendors as required

### **REQUIREMENTS & QUALIFICATIONS**

- At least 5 years of project management or related experience
- Experience working directly with customers and internal teams to drive world-class results
- Strong track record of relationship building to increase customer happiness and loyalty
- Ability to accept and embrace change within fast-paced business environment
- Solid organizational and time management skills, including strong attention to detail
- Excellent verbal and written communication skills

- Experience working with traditional and agile methodologies preferred
- Experience working with JIRA and Confluence project management tools preferred
- Technical background with understanding of software development, web and database technologies preferred
- Background in production agriculture, precision agriculture and basic understanding of the industry preferred
- Bachelor's degree

#### **BENEFITS**

- Collaborate with an incredibly talented team
- Innovate with big data in a dynamic, real-time environment
- Casual dress in a creative work environment
- Free lunch (and snacks and cookies and t-shirts...)
- Eligible for Farmobile's retirement savings plan and group health plans, including medical, dental, vision and other voluntary benefits
