## DEVOPS ENGINEER

### #FARMERPOWER

Farmobile is a growing AgTech startup passionate about helping farmers to collect, share and monetize their data for real-time visibility, better insights and revenue opportunities to strengthen farm families. Farmobile brings that mission to life with a culture founded on employee empowerment, mutual respect, collaboration and fun. Led by CEO Jason Tatge, Farmobile's team is 100% committed to organizing the industry by delivering never-before-seen technology to farmers while maintaining trust and transparency with customers. The team is full of rock stars, who work "hard and smart" to solve some of agriculture's biggest challenges. It is an amazing place to work. Join us!

### RESPONSIBILITIES

- AWS/Cloud technologies subject matter expert
- Advocate DevOps culture and best practices among developer scrum teams
- Architect and manage complex cloud solutions that meet strict performance, security, and uptime requirements
- Develop and maintain deployment pipelines that deliver new features to end users in a safe and rapid manner
- Manage and build cloud infrastructure with Terraform IaC in a multi-account environment
- Build, optimize, and orchestrate containerized applications
- Enforce governance of security and cost management best practices
- Monitoring complex systems and increasing observability posture
- Ensure high application availability to our end users with participation in an on call rotation
- Discover and evaluate new technologies that enable Farmobile to better deliver value to our customers
- Assist with help desk support as needed

### REQUIREMENTS & QUALIFICATIONS

- BS/MS degree in Computer Science, Computer Engineering or a related field
- Demonstrated ability to architect and implement cloud based solutions to meet business requirements
- Scripting in Shell, Python, and/or other programming language experience (i.e. Go, Groovy, C++, Java, etc.)
- Proven ability to manage AWS IaaS and PaaS services (EC2, S3, Lambda, Aurora, SQS, Kinesis, IoT, etc)
- Solid understanding of network/VPC design, security, and best practices
- Experience with container orchestration (ECS, Kubernetes, etc) and microservice architecture
- Extremely strong troubleshooting skills
- Experience in monitoring complex cloud environments (APM, dashboarding, log aggregation, alerting, etc)
- Familiar with installing, configuring, and maintaining UNIX/Linux based environments
- Ability to participate in call rotation (potentially off hours)
- Strong written and verbal communication skills, including the ability to explain technical issues to a non-technical audience
- Self-motivated work ethic, great attitude, and a willingness to support the company as needed
- Comfort working in a fast-paced environment
- AWS Associate/Professional certification(s) are a plus

### BENEFITS

- Collaborate with an incredibly talented team
- Innovate with big data in a dynamic, real-time environment
- Casual dress in a creative work environment
- Free lunch (and snacks and cookies and t-shirts...)
- Eligible for Farmobile's group health plans, including medical, dental, vision and other voluntary benefits
